Course description

Participants will learn about current concepts in pediatric fracture management. The indications for, techniques and complications of operative methods will be considered and compared with conservative alternatives.

Target participants

This course is targeted at orthopedic and trauma surgeons and senior trainees with advanced knowledge and skills in operative fracture treatment who wish to broaden their knowledge in this specific field of treating children and adolescents.

Learning objectives

- At the end of this course, participants will be able to:
- Manage children's fractures and complications at all ages
 - Understand growth and remodelling
 - Apply principles of elastic nailing and surgical fixation of elbow and physeal fractures
